

## Printing/Saving a Works Cited Page

When you're done with your Works Cited page, you still have one step to go to print it, or get a version you can paste onto the end of a paper.

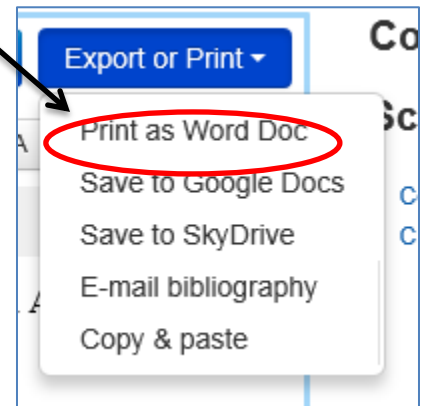

There are very specific rules about how to arrange a works cited page – how to format the paper, indenting rules, alphabetizing rules. If you copy the screen as you see it below, your works cited page will be wrong.

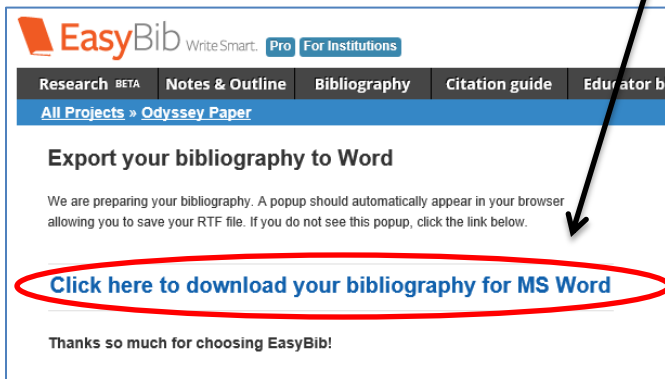

EasyBib will format the page correctly for you.

To tell it to do so, press the blue "Export or Print" button at the top of your list of entries.

Several options for saving your page will open. To get a word version you can print or save, select "Print as Word Doc."

EasyBib will ask you to Click to download the page. Click the link.

Click "Save as" and then save just like you save anything else. You will choose where to save (ie your H: drive), a name for the page so you can find it later. Put it in a place you'll be able to find it!
